SLIMUP[®]

NEW FROM EUROPE

Automated, custom treatment technology for personalized results and a highly-profitable business

Foggiare Wellness Centers feature proprietary, FDA-listed **Slim Up** technology with a full range of health, beauty and wellness programs for men and women of all ages. The non-invasive treatments are clinically proven and guarantee results, often in a single session. And with space-efficient "smart" technology, the patient care program is almost entirely automated for operational efficiency.

This brochure considers the four essential technologies featured in a state-of-the-art Foggiare Wellness Center, including the following:

1 SLIMUP[®] STATION

A unique way to treat your clients' individual needs: This technology provides a comprehensive client evaluation, collecting hundreds of data points about the patient's body and lifestyle before generating a tailored treatment program that offers unmatched analytical precision. See pages 4-5 for details.

SLIM UP TOP CARD

Each patient's selected treatment plan is programmed onto the Slim Up Top Card, a "smart card" that automates the treatment plan. The Slim Up Top Card has a built-in transponder that identifies the customer and automatically calibrates each piece of technology to the patient's specifications and records session activity.

2 SLIMUP[®] MUST

An all-in-one muscle and skin stimulator: LOCALIZED infrared light and gentle muscle electro-stimulation are combined for a wide range of healthy, beauty and wellness applications. See pages 6-7 for details.

3 SLIMUP[®] STEAM

Heat, steam and fragrant aroma combined in one: The thermal, warming effect of TOTAL BODY infrared is blended with a delicious-smelling aromatherapy steam bath for beautiful, feel-good results. See pages 8-9 for details.

4 SLIMUP[®] DRAIN

Helps circulate the body's lymphatic fluids: This device uses lymphatic drainage massage, or pressotherapy, which is especially relaxing because it helps reduce pain levels and stress, which promotes overall vitality and well-being. See pages 10-11 for details.

SLIM UP[®] STATION

THE **SLIM UP STATION** IS DESIGNED TO HELP YOUR WELLNESS TEAM CREATE A SPECIALIZED TREATMENT PROGRAM THAT'S PERFECTLY TAILORED TO EACH PATIENT'S AGE, BODY MORPHOLOGY, AND LIFESTYLE.

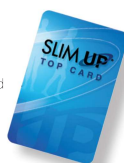

The technology is user-friendly and intuitive, featuring a touchscreen interface and automated evaluation that requires only basic training. This not only simplifies the process for the operator, it also ensures analytical precision for optimal patient outcomes.

Once the patient's file information and treatment plan are recorded on the **Slim Up Top Card**, the patient is free to return to your wellness center for self-guided sessions (that require little staff support).

SLIM UP TOP CARD

Here, Top Cards are programmed and read (to evaluate treatment plan progress).

CUSTOMER MASTER FILE

All patient data is stored electronically in the Slim Up Station master file repository, including contact info, photos, measurements, treatment plans and progress reports.

TECHNICAL SPECIFICATIONS:

POWER VOLTAGE: 110 V~

FREQUENCY: 50 Hz

ABSORBED POWER: 400 W

TYPE: BF fitted parts; continuous function

DIMENSION (HxWxL): 79.5 x 34.5 x 16.5

SLIM UP STATION TREATMENT PROGRAMS AIMED AT SPECIFIC FUNCTIONS.

BEAUTIFY

It is a treatment that integrates the more active technologies to improve the tone and the firmness of skin. It will lead to firmer skin, with a smoother, brighter and healthier appearance. When applied to loose skin, stretch marks or cellulite, it helps to achieve a more sculpted body, with tighter and smoother skin.

BE-WELL

It is a whole-body strategy studied to achieve optimal well-being in particular of the vascular sector. The combination of the best technologies leads to the improvement of peripheral circulation, the stimulation of cutaneous microcirculation, the mobilization of the body fluids, removal of metabolic wastes, that are often cause of heaviness in the lower limbs, edema, varicose veins, cellulite. This wellness treatment restores lightness and a general feeling of vitality. It is suitable for all ages, in synergy with an active lifestyle, a correct diet, a right amount of sleep and the reduction of stress.

AGE-DEFY

This complex body treatment program fights the signs of aging. Over time the production of collagen and elastin decreases, the water content decreases and the skin becomes thinner, flabby and fragile, favouring the appearance of wrinkles. The treatment stimulates cellular reproduction and allows the youthful splendour all over the body. It also promotes an improvement in muscle tone and a reduction in the classic joint soreness, characteristic of age.

BE-ACTIVE

It is a program studied to increase muscle tone, recover after an intense workout or even prepare oneself for a sport event. Ideal for amateur or professional athletes, or for any active person who wants to give their body the right attention after the stress of hard training, this program, in addition to improving muscle mass, avoids injuries, stress soreness, chronic pain or any other type of muscle tension slow down in sports practice.

New Patient Evaluation, Step-by-Step

1 CREATE PATIENT FILE

The patient's personal data is entered using the touchscreen menu options, including Profession, Physical activity, Physical morphology, Known diseases or health conditions.

2 TAKE PHOTO IDENTIFICATION

The patient is photographed for easy recognition.

3 RECORD BODY MEASUREMENTS

Full body measurements are taken electronically, documenting the patient's height and the dimensions. Once recorded, the Slim Up Station compares these measurements with the ideal physique, providing an explanatory assessment of patient objectives.

4 WEIGH PATIENT AND SCAN IMPEDANCE

The patient is weighed and gets a bioelectrical impedance analysis to estimate the body composition and identify the patient's weight target.

EVALUATE SKIN CONDITION

The appearance, texture and location of skin imperfections and blemishes are carefully described and registered.

6 GENERATE TAILORED TREATMENT PROGRAM

The patient is provided with a treatment plan that includes detailed instructions on their session setup and positioning, as well as proposed progress check-ins along the way.

7 PREPARE DIET AND LIFESTYLE RECOMMENDATIONS

To ensure the approach is holistic, patients are provided with a tailored diet and lifestyle program. Exercises are clearly illustrated onscreen so they're easy to understand.

8 CREATE A TREATMENT PLAN

The full cost of the treatment is displayed.

9 PRINT THE PATIENT PLAN

The full assessment, treatment plan and cost estimate are printed for the patient.

10 LOAD TREATMENT PLAN ON THE SLIM UP TOP CARD

Once the patient commits to a plan, their personal Top Card is programmed.

SLIM UP® MUST

THE FDA-CLEARED **SLIM UP MUST** COMBINES ELECTRICAL MUSCLE STIMULATION WITH **LOCALIZED INFRARED LIGHT THERAPY**, 2 CLINICALLY-PROVEN TECHNIQUES THAT PRODUCE EXTRAORDINARY RESULTS.

Infrared penetrates deep into skin tissue with a warm, peaceful sensation, helping to increase blood circulation and eliminate lactic acid and other harmful substances that accumulate in the body, while revitalizing cellular and metabolic activity.

Electrical Muscle Stimulation (EMS) uses low-level electrical currents or impulses to stimulate the muscle tissue, inducing powerful muscle contractions that are superior to regular exercise. Over time, as muscles are strengthened, firmed and toned, the physique is re-sculpted.

Slim Up Must has a computerized control unit that is highly sophisticated, yet easy to use. Infrared lamps are ideally positioned to ensure the uniform penetration of rays, although they may be electronically adjusted to regulate heat intensity. The mobile trolley shifts, allowing the user to target specific body areas with concentrated action. Both the infrared intensity and session duration are controlled by a sensor and a timer.

TREATMENT

Programs begin with a warm-up and finish with a cool down. During these phases, different frequencies, pulse widths, contractions and recovery times are automatically selected according to the patient's treatment program.

This multi-phased approach is designed to isolate muscles and ensure optimal results.

TREATMENT APPLICATIONS:

- Sculpts the body
- Slims and supports weight loss
- Smooths cellulite's dimpled appearance
- Firms and tones skin
- Increases muscle strength and endurance
- Defines muscles

PAIN RELIEF AND SPORTS RECOVERY

- Relaxes muscles
- Relieves muscle pain and joint stiffness
- Treats DOMs (Delayed Onset Muscle Soreness) and arthritis

Build Muscle, Slim and Tone, all in one

TECHNOLOGY THAT IS ERGONOMIC,
PORTABLE AND SPACE-EFFICIENT

TECHNICAL SPECIFICATIONS:

- 8 channels with adjustable intensity levels with rectangular waves
- 6 Treatment Programs
- POWER VOLTAGE: 110 V~
- FREQUENCY: 50 Hz
- ABSORBED POWER: 800 W
- TOTAL POWER AVAILABLE FOR LAMPS: 600 W (for 6 lamps, each 100W)
- TYPE: BF fitted parts; continuous function; sectioning and cutout by switch; high-sensitivity residual current circuit breaker
- DIMENSION (HxWxL): 74 x 22 x 37,5 (folded)
31,5 x 51 x 37,5 (open)
28,3 x 26,7 x 80,7 (table)

Table sold separately

SLIM UP® STEAM

COMBINING THE THERMAL, WARMING EFFECT OF **TOTAL BODY** INFRARED WITH A DELICIOUS-SMELLING AROMATHERAPY STEAM BATH, **SLIM UP STEAM** OFFERS PATIENTS A WEALTH OF HEALTH AND BEAUTY BENEFITS.

Slim Up Steam boosts circulation to stimulate natural lipolytic activity, eliminate metabolic waste, and improve overall cardiovascular health. With increased vascularization, pores are opened and nourished with essential oils, as reoxygenated skin tissue is deep-cleaned and purified of pore-clogging debris.

VAPORIZATION & AROMA BENEFITS

- Better absorption of aromas conveyed by steam through sweat glands activated at their most and through sebaceous glands freed from sebum
- Vessel toning, reducing and firming effect due to the nature of aromatic active principles

TREATMENT APPLICATIONS:

WELLNESS

- Reduces stress
- Relieves stiff, sore joints
- Alleviates pain
- Burns calories stimulates increased metabolism to support weight loss

SKIN BEAUTIFICATION

- Rehydrates and smooths sun-damaged skin
- Revitalizes drooping, aging skin
- Restores skin radiance and healthy appearance

Heat, steam and fragrant aroma combined in one

SLIM UP STEAM HAS 5 PRE-PROGRAMMED SETTINGS AND 3 DIFFERENT AROMAS.

- 5 automatic work programs alternate and combine the operation of infrared rays, steam and aromatherapy (with the opportunity to select 3 different aromas) and 3 functions for the manual selection of IR, steam and aromas.
- Only 3 push-buttons, along with a complete and immediate response of the back-lit alphanumerical display, make it possible to easily select all functions.
- Transponder uploading system for the Top Cards in which the treatments recorded by the Slim Up Station are stored; after these have been performed, they are automatically taken off the Top Card.

3 reservoirs for managing
3 different aromas

Waste water tank

TECHNICAL SPECIFICATIONS:

- POWER VOLTAGE: 110 V~
- FREQUENCY: 50 Hz
- ABSORBED POWER: 3,000 W
- TOTAL POWER AVAILABLE FOR LAMPS: 900 W (for 9 lamps, each 100W)
- STEAM GENERATOR POWER OUTPUT: 2,000 W
- TYPE: continuous function; sectioning and cutout by switch high-sensitivity residual current circuit breaker
- DIMENSION (HxWxL): 52 x 90 x 54,5 (closed)
96 x 90 x 54,5 (open)

SLIM UP[®] DRAIN

SLIM UP DRAIN PROVIDES WHOLE-BODY LYMPHATIC DRAINAGE MASSAGE, OR PRESSOTHERAPY, TO ENHANCE NATURAL LYMPHATIC FLOW AND VENOUS BLOOD CIRCULATION.

Human health is heavily dependent on the lymphatic system, which is responsible for transporting essential proteins, nutrients and toxins. With age, blood vessels begin to narrow and become clogged, which results in harmful toxins accumulating in tissues. Over time, the lymphatic drainage system fails, resulting in fluid and weight retention, cellulite, varicose veins, sluggish metabolism, and swollen, puffy skin.

Slim Up Drain reverses this effect, helping the body release metabolic waste for better health. Applications are broad, and in many cases, visible results can be felt and seen after a single session.

GRAPHICAL DISPLAY

A wide graphical display illustrates the program sequences and compression treatment areas, including setup and pressure values as well as cyclical pause times.

TREATMENT SETUP

Slim Up Drain is truly user-friendly; along with a graphical interface, the software is pre-programmed, intuitive and has only four buttons to operate.

"SEA WAVE" SYSTEM

The Slim Up Drain uses a "Sea Wave" system comprised of overlapping segments that are sequentially inflated (before the previous one is completely deflated), allowing for selective, progressive pressure that is uninterrupted for optimal efficacy.

Table sold separately

A WHOLE-BODY TREATMENT APPROACH

UPPER LIMBS

There are two arm pieces and several Sea Wave sectors for the sequential treatment of upper limbs. A hand piece and Velcro-adjustable arm piece provide continuous, gentle pressure that extends from the palm (and back of the hand) to the upper shoulder.

LOWER LIMBS

There are multiple compressors for the lower body, including two for legs, two for thighs, two for the groin and one corset-like piece for the thighs and buttocks.

Each leg piece has four Sea Wave sectors and an arch support made of a specialized, self-molding material and an air pocket that provides direct, targeted pressure to the soles of feet (while avoiding the sensitive sides of feet) and uninterrupted, consistent compression that spans the entire leg.

The thigh-piece is adjustable, adapting to work with every height and body type, and the groin compressor is anatomically designed to ensure perfect lymphatic drainage of the groin area (no matter the physique).

The corset-like piece for the hips and buttock has two Sea Wave sectors that adjust with Velcro-fastening to fit different body types.

TREATMENT APPLICATIONS:

HEALTH & WELLNESS

- Relieves of "heavy leg" syndrome (leg pain and swelling) – instantly
- Reenergizes for a feeling of "lightness"
- Soothes neuromuscular tension
- Maintains metabolic health and helps with weight management
- It is a fundamental aid to the process of normalization of the venous and lymphatic circulation

BODY SHAPING

Slims the body and decreases water retention (ideal for treating edemas from pre- and post- weight-loss surgery)

Helps circulate the body's lymphatic fluids

TECHNICAL SPECIFICATIONS:

- POWER VOLTAGE: 110 V~
- FREQUENCY: 50 Hz
- ABSORBED POWER: 300 W
- TYPE: BF fitted parts, continuous function
- DIMENSION (HxWxL): 49 x 21 x 14,5 (monitor)
28,3 x 26,7 x 80,7 (table)
